SKILLS

- React.js
- Redux
- Node.js
- Typescript
- MongoDB
- MySQL
- Styled Components
- Amazon AWS

LANGUAGES

- Spanish - Native
- English - Professional

ABOUT ME

I'm a highly motivated web developer specialized in the **JavaScript** environment encompassing the full stack from front-end to back-end and databases. I use React.js to design functional components whose state is managed either by Redux Toolkit or React's context API, depending on the application's size and needs. Then server side I use Node.js, in particular the Express framework, in order to design RESTful API's that serve the client with dynamic data from my database architecture.

I then deploy my applications with Netlify for the front-end and Heroku or AWS for the backend and databases. I use Jest and Cypress for testing and currently I'm introducing Typescript for strict type checking and bug prevention. I have experience working with Git using a SCRUM workflow.

I'm a natural problem solver who enjoys researching new technologies and solutions for any situation that may arise. I'm fast paced and a team player with solid communication skills.

EDUCATION

July 2020 - Educatic Fomento **PHP Course**

Learned PHP syntax, functions, OOP, MySQL DBO, REST API, Laravel MVC.

March 2021 - Codecademy **Web Developer Course**

Learned full-stack web-development, html5, css3, JavaScript ES6, React.js, Express.js, MongoDB, SQL, Testing with Mocha and Chai, data structures and algorithms.

September 2021 - IT Academy **React Bootcamp**

Learned React.js framework, React hooks, state management with context API, data fetching with AXIOS and fetch API, styling with Styled-Components and Tailwind, Git and SCRUM workflow.

WORK EXPERIENCE

ILUNION - 02/2011 to 06/2021 **Night Auditor**

Tasks: Accounting, system administration, data input, security, customer service, revenue management, reservations management.
